THE TRULY WATERPROOF
INTERLOCKING DECKING SYSTEM

The innovative tongue-in-groove design of the AridDek Waterproof Deck System creates a seamless single layer surface with an integrated hidden gutter system that channels water away from your structure to create a beautiful, low-maintenance deck surface with a usable dry outdoor living space below.

AridDek is engineered to create a completely watertight deck surface. The easy-to-install, low-maintenance deck boards add both value and extra living space in one application. Each interlocking board is secured with a hidden fastener system for a continuous, slip-resistant outdoor deck.

AridDek is ideal for new construction or remodeling existing outdoor structures and provides a lifetime of low-maintenance benefits while creating a 100% dry outdoor living space in a single, beautiful deck system.

### AridDek Waterproof Deck System

**MATERIAL**
6005-T5 Series Marine Grade Aluminum  
(Extruded For Precision)

**LENGTH**
Up To 36’ Lengths Available

**WEIGHT**
1 Lb. Per Linear Foot or 2 Lbs Per Square Ft.  
(Approximately 1/2 The Weight Of Wood)

**WIDTH**
Main Boards: 6”  
Start & Finish Boards: 5 ½”

---

**MEETS INTERNATIONAL BUILDING CODE:**

**Strength:** 1950 lbs per square foot (PSF) at 24 inches and 550 lbs per square foot (PSF) at 36 inches on-center for multiple span spacing.

**Finish:** A low-maintenance, powder coated finish that is slip resistant and provides traction in wet or dry conditions.

**Stays Cooler To The Touch:** Even in the hottest environments, aluminum deck boards stay cooler to the touch than traditional deck materials like composite boards or wooden deck planks.

**Non-Toxic:** Non-porous material; naturally resistant to mold, mildew, and bacteria; does not require harsh chemicals or sealants.

**Durable:** Will not split, decay, crack, or rot; will not become brittle in extreme cold.
